

## Property History

Silliman College is the largest of all 12 residential colleges on Yale University's New Haven, Conn. campus. It was named after Benjamin Silliman, the "father of the scientific education," who was the first professor of chemistry at Yale, and later became a renowned geologist. Opened in September of 1940, the college was designed by Otto R. Eggers, of Eggers and Higgins, an architectural firm based out of New York City. Renovations on Silliman College began in 2005 and were completed in August of 2007. It was during this period that Grand Light's restoration specialists began their work on over one hundred indoor and outdoor fixtures of various sizes.

## Project Description

Renovations on the campus began in 2005 and were completed in August of 2007. It was during this period that Grand Light's restoration specialists worked on over a hundred indoor and outdoor fixtures of various sizes.

These fixtures underwent several different restoration techniques including extensive metal reshaping, refinishing, and the fabrication of custom intricate glass panes.

All fixtures were rewired with UL listed components and HIPOT tested in accordance with UL standard 1598.

## Client

Yale University
