

Breathing New Light Into Beacon Hill

A Massachusetts State House Senate Chamber Case Study

Join Grand Light's Ryan Stockman in an in-depth review of the Massachusetts State House Senate Chamber preservation project. Receive exclusive insight into the preservation and restoration of an iconic space including the proprietary processes and innovative procedures used in restoring the historic lighting fixtures, including a historic 30ft+, 112 light multi-tiered chandelier modified to accept modern LED lamping technology.

"Breathing New Light Into Beacon Hill" is being exclusively offered to members of the restoration and custom lighting community. Don't miss out on your opportunity to schedule a session for your company today!

Course Summary

This project included the restoration of a gigantic chandelier over 30' tall, numerous cast brass wall sconces, and a set of beautiful torchieres located on the Senate Chambers podium. This project also included the design and manufacturing of custom chandeliers based off a historic photograph. The course will offer in-depth analysis of the following:

- **Pre-Project Planning**
- **Specification Development**
- **Restoration Processes**
- **Logistics**

General Course Information

Presenter: Ryan Stockman

Course Level: Introductory

Course Delivery Type: In-Person/Virtual

Course Length: 1 Hour

Course Credits: N/A

Language: English

Featured Presenter - Ryan Stockman

Ryan Stockman, Vice President of Grand Light, is a nationally recognized lighting restoration expert. Backed by over 15 years' experience having held various sales, engineering, and manufacturing positions, he has led many of the company's award-winning restoration, replication, and custom lighting projects.

Over the past decade, he has gained experience modifying existing lighting systems with energy efficient LED retrofit kits for a variety of clients including government, religious, educational and cultural institutions, architects, electrical contractors, and designers. His approach with LED retrofitting focuses on preserving the historic integrity of a fixture, while upgrading an existing lighting system with brighter, more efficient lighting.
